

# EXPLANATION

## SEDIMENTARY AND VOLCANIC ROCKS

### Surficial sediments

- Qal - alluvium, stream wash, slope debris.
- Qs - sand dunes, wind-blown sand deposits.
- Qf - fan deposits, Lower Centennial Flat.
- Ql - playa deposits

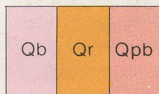

### UNCONFORMITY

### Older surficial sediments

- Qoa - older alluvium.
- Qog - older gravel deposits, Owens Valley.

### UNCONFORMITY

### Volcanic rocks

- Qb - basalt flows.
- Qr - rhyolite and perlite domes.
- Qpb - basalt cinder cones.

### UNCONFORMITY

QTp - bedded basaltic lapilli tuff, includes olivine basalt flows (QTb)

Volcanic rocks of Hill 4580  
(sec. 12, T. 18 S., R. 38 E. proj.)

- Tr - rhyolite plugs.
- Tpr - rhyolite tuff and varicolored rhyolite

Andesite of Sugar Loaf

### Coso Formation

- Tc - undifferentiated sedimentary rocks, including arkosic sandstone and lake bed deposits, and diatomite (Tcd)
- Tcpr - undifferentiated rhyolitic pyroclastic rocks, includes red tuff and interbedded lake bed deposits (Tcpc).

Red beds

### UNCONFORMITY

QUATERNARY  
 {  
 Holocene  
 Pleistocene and Holocene  
 }  
 CENOZOIC  
 {  
 TERTIARY AND QUATERNARY(?)  
 Pliocene and Pleistocene(?)  
 }
